

**UNIVERSITY OF JAMMU
JAMMU**

To

All Deans / HODs /Rectors/Directors

(For Circulation amongst Teachers, Scholars & Students)

There were compelling circumstances which arose on the late evening of October 13, 2015, wherein a student organization wanted to organize a Student Leaders' Conference in front of the Central Library of the University without permission and in violation of the norms and thereafter despite all efforts by the University Authorities to persuade them to shift the venue, it was decided to suspend the working on the campus on October 14, 2015, to prevent any chance of any likely confrontation with the student organization as also to prevent any unwanted / outside elements to disturb the peace of the Campus by indulging in any undesirable act.

As per norms, unauthorized holding of rallies etc., is not permissible on the Campus, as this temple of learning has to be kept above all the student organizations agenda so that the teaching – learning atmosphere is not disturbed and that the same is conducive for the students to nourish their talent.

It is impressed upon all the stake holders of the University to please make sure that such unwanted activities do not make us to shift our basic focus for which any University System stands, and i.e. pursuing of higher education and research,. Those institutions who have let such agenda overshadow the basics are not the ones which students boast of to be the products of.

Apart from teaching inputs of the Worthy teachers, their cooperation is also sought in inculcating a sense of belongingness for the university and counseling of the misguided youth, who feel that they are law unto themselves and that they are the ones who can arrogate the rules, the way they want to. With innumerable student organizations emerging, this will result into a total chaos and jeopardize the academic interests of the University.

The cooperation of one and all is solicited in the overall interest of the students, the scholars and all the stakeholders in general and the future generations in particular to make this University stand for which it should actually stand for i.e. Academics, Research and Civility.
